Editorial

Part I: Short project notes

Tram stop <i>Výstaviště</i> in Prague Holešovice	3
<i>Jan Nováček Petr Tomečka Jiří Stráský</i>	
Development of fully precast lightweight steel-UHPC composite bridge.....	7
<i>Xiangfeng He Feixin Huang Minghong Qiu Banfu Yan Xudong Shao</i>	
Construction of extradosed bridge with butterfly webs—Shin-Meishin Mukogawa bridge	11
<i>Katsuhiko Mizuno</i>	
Seismic isolation design and analysis of a complex medical building	15
<i>Shuangjun Hou Yujie Chen Hao Wu Zhen Wang</i>	
REVER headquarters—An office building with curved walls using nondrying shrinkage type concrete	19
<i>Satoshi Kawamura Kazumasa Inoue</i>	
Application of prefabrication construction method to the Asia’s largest plant for sewage treatment.....	22
<i>Yong Yuan Ding-Li Jin Luc Taerwe Guo-Qiang Zhao Da-Shi Zhang Jiao-Long Zhang</i>	
Nakatsugawa Bridge	29
<i>Kenichi Nakatsumi</i>	
A highway bridge—A database for digital methods	32
<i>Sylvia Kessler Alexander Mendler Alina Klemm Yogi Jaelani Martin Köhncke Max Gündel</i>	
Midspan expansion joint at Loko Oweto Bridges, Nigeria(or: “This bridge is too long, what should we do?”).....	36
<i>Micha Petri</i>	

Part II: Papers on Design & Construction

Numerical simulation of concrete structures—From research to engineering application.....	41
<i>Vladimir Cervenka Jan Cervenka Jiri Rymes</i>	
Challenges in structural design and execution: Stuttgart’s new central station	64
<i>Roland Bechmann Angelika Schmid</i>	
Structural design of a smart under-deck cable-stayed prestressed concrete viaduct: Theoretical basis and application to the Osormort viaduct.....	84
<i>María del Mar Corral Leonardo Todisco</i>	

The Arousa Island bridge. Complete refurbishment and 10 years analysis description	110
<i>José Antonio Becerra-Mosquera Diego Carro-López Manuel F. Herrador</i>	
Experimental study on protection of prestressed concrete box girder under vehicle explosion of bridge deck	120
<i>Qixin Sun Chao Liu</i>	
Dynamical analysis of a 40 m span precast posttensioned concrete girder during lifting operations	150
<i>Gabriel Henrique Arruda Tavares de Lima Pablo Augusto Krahel Tiago Morkis Siqueira Maria Cristina Vidigal de Lima</i>	
Effect of uniaxial loading on the spalling of concrete panels for Melbourne's Metro Tunnel Project	168
<i>Maurice Guerrieri Duffy Lee Vern Lee Luke Haines</i>	
Delayed deformation of confinement buildings: 30-Year in situ measured data and prediction with the next-generation Eurocode-2	194
<i>Abudushalamu Aili Jean-Michel Torrenti Francis Barre Ludovic Caba</i>	
Influence of modeling choices and prior information on the Bayesian assessment of a reinforced concrete bridge	205
<i>Eline Vereecken Wouter Botte Geert Lombaert Robby Caspeele</i>	
Simplified method for predicting the internal forces in strut-and-tie model of cable pylon anchorage zone in a cable-stayed bridge	228
<i>Shengyu Li Erwin Lim Zhengqing Chen Yu Hong Qianhui Pu</i>	
Reliability evaluation of reinforced concrete arch bridges during construction based on LGSSA-SVR hybrid algorithm	244
<i>Xu Binlin Tian Zhongchu Shen Xiaoping Bai Wenguang</i>	
Digital twins for engineering structures—An Industry 4.0 perspective	262
<i>Johannes Wimmer Thomas Braml</i>	
The digital twin use for modeling the multi-storey building response to seismic impacts	279
<i>Mykola Marienkov Iurii Kaliukh Olexandr Trofymchuk</i>	
Experimental and theoretical investigation of shear lag effect in twin box-shaped composite girders of long-span cable-stayed bridges	297
<i>Qincong She Donghuang Yan Changsong Chen Hua Luo Linmei Wu Bin Li Jianqiang Feng</i>
